

# Tusca Plus™

---

## COMPOSITION

**Tusca Plus™** Syrup: Each 5 ml syrup contains Guaifenesin BP 100 mg, Levomenthol BP 1.1 mg & Diphenhydramine HCl BP 14 mg.

## PHARMACOLOGY

This preparation is a mixture of expectorant, decongestant and antihistamine. Guaifenesin is an expectorant. It helps to loosen mucus in chest and throat caused by common cold, infections, or allergies. Levomenthol helps to breathe more easily by relieving congestion. Diphenhydramine is an antihistamine that reduces the effects of natural chemical histamine in the body. It is used to treat sneezing, runny nose, watery eyes, hives, skin rash, itching & other cold or allergy symptoms.

## INDICATION

**Tusca Plus™** is indicated for the symptomatic relief of upper respiratory tract disorders accompanied by productive cough.

## DOSAGE AND ADMINISTRATION

12 years and above: 10 ml 4 times a day.

## CONTRAINDICATION

This combination is contraindicated in patients with a known hypersensitivity to Guaifenesin, Levomenthol or Diphenhydramine. If Monoamine Oxidase Inhibitors (MAOIs) have been taken in the last two weeks this combination should not be taken. This combination is not suitable for children under 12 years of age.

## SIDE EFFECT

Side effects may include swelling of the face, lips and/or tongue, allergic reactions, numbness, drowsiness, dizziness, blurred vision, dry mouth/nose/throat, nausea or vomiting etc.

## PRECAUTION

Patients suffering from liver, kidney & prostate problems should avoid this combination. Alcohol must be avoided. If any other medicines like minor Tranquilisers, Barbiturates, Codeine are taken, caution should be exercised. Patients taking this combination need to be careful while driving or operating machinery.

## USE IN PREGNANCY AND LACTATION

There are no specific data on use of this combination during pregnancy & lactation.

## STORAGE CONDITION

Protect from light, store in a cool and dry place. Keep out of the reach of children.
