

SQZYME SSF[®] Powder

A novel complex enzyme designed for the poultry industry

Composition:

Each gram SQZYME SSF[®] powder contains -

| <i>Enzymes</i> | <i>Minimum Activity Unit</i> |
|----------------|------------------------------|
| Amylase | : 7,400 U |
| Xylanase | : 2,000 IU |
| Beta glucanase | : 200 IU |
| Protease | : 900 HUT |
| Pectinase | : 30 IU |
| Cellulase | : 15,000 U |
| Phytase | : 300 FTU |
| Lipase | : 5,000 USP |

Indication:

To improve digestion of feed ingredients including NSP's (Non Starch Polysaccharides) and anti-nutritional factors present in the feedstuff like certain plant residues which cannot be digested due to lack of endogenous enzymes.

Highlighting Points:

- It is stable at pelleting temperature (70-85°C)
- Stable at varied pH condition of the gut observed in the animal or poultry
- Reduces fecal loss of Phosphorus
- Helps in improving the litter quality & reduces the environmental pollution leading to health benefit of the birds
- Helps in breaking down NSPs & reduce the anti-nutritional factors leading to faster and complete digestion of feed
- Helps in increasing the utilization of energy, minerals other micro and macro nutritional components of the animal feed leading to better weight gain & consistent performance

Dosage & Administration:

Layer : 150gm / Ton of Feed – use regularly

Broiler : 200 gm / Ton of Feed – use regularly

Breeder : 150gm / Ton of Feed – use regularly

Or as suggested by poultry nutritionist or registered veterinary doctor.

Contraindication:

None

Drug Interaction:

It is compatible with other medicinal products and all other forms of feed additives

Withdrawal Period:

None

Storage:

Store at room temperature, cool & dry place.

Supply:

25 Kg bag.
