PHARMACOLOGY

Hingastak churna is a polyherbal ayurvedic medicine used as a digestive, carminative, astringent and as an antacid. The ingredients present in Hingastak churna have been shown in different studies to possess biological properties related to antioxidant mechanism. *Ferula assafoetida* is known potent anti-oxidant, which protects free radical mediated gastric ulceration and carcinogenesis. The active constituent's asaresinotannols 'A' & 'B' and ferulic acid of *Ferula assafoetida* help to reduce hyperacidity and abdominal pain. Phenolic amides of *Piper nigrum* has a stimulating effect on digestive organs and increase the flow of saliva and gastric juices. Active component Zerumbon and gingerol of *Zingiber officinale* reduce pain & inflammation of esophagus. *Trachyspermum ammi* is very effective in treating the excessive secretion of gastric gases. Moreover, Hingastak churna offers gastro-protection by increasing prostaglandin synthesis, mucin secretion and protects the stomach from injury.

INDICATION

Hingastak Churna is indicated in hyperacidity, peptic ulcer disease, NSAIDs induced gastric ulcer, gastritis and dyspepsia. It is also useful in gastroenteritis as an adjuvant therapy with antibiotics.

DOSAGES

One Hingastak Churna capsule 2 times a day just before meals or as directed by the physician.
