Combicid™

Clobetasol Propionate, Ofloxacin,
Ornidazole & Terbinafine Hydrochloride

COMPOSITION
Combicid™ Cream: Each gram cream contains Clobetasol Propionate USP 0.50 mg, Ofloxacin USP 7.50 mg, Ornidazole INN 20 mg & Terbinafine Hydrochloride BP 10 mg.

PHARMACOLOGY
Combicid™ Cream is a combination cream which exhibits anti-bacterial, anti-fungal, anti-protozoal & anti-inflammatory actions. Ofloxacin is a broad-spectrum antibiotic that acts against many gram-positive & gram-negative bacteria. Ornidazole belongs to the nitroimidazole group of antibiotics and is used to treat amoeba and trichomonas infections. Terbinafine is an Allylamine antifungal that inhibits biosynthesis of Ergosterol (an essential components if fungal cell membrane) via inhibition of Squalene Epoxidase enzyme causing fungal cell death. Clobetasol is a potent corticosteroid which exhibits anti-inflammatory, anti-pruritic and vasoconstrictive properties.

INDICATION
Combicid™ Cream is indicated in the treatment of mixed and complicated Fungal, Protozoal & Bacterial infections, mild to moderate vaginitis, candidiasis and trichomoniasis, pruritus vulvae, dermatitis, eczema, genito-urinary infections.
