

Maximilk™

Fennel, Fenugreek, Cumin, Aniseed extract, Cumin & Dill Powder

COMPOSITION

Maximilk™ Capsule: Each capsule contains Fennel extract 83.33 mg, Fenugreek extract 83.33 mg, Cumin powder 83.33 mg, Cumin extract 83.33 mg, Dill Powder 16.67 mg & Aniseed extract 16.67 mg.

PHARMACOLOGICAL ACTION

Fenugreek extract stimulate the body's own prolactin production, so that breast milk production is stimulated. Fennel extract supports milk production and helps against flatulence in babies. Cumin contains active ingredients such as carvone and terpenes, which can stimulate your milk flow. Dill powder can reduce the risk of inflammation of the mammary glands. Aniseed extract promotes the stimulation of milk production. Combination of these natural herbs results in increase milk production in breastfeeding mothers.

INDICATIONS

Maximilk™ capsule is indicated for increased breast milk production in lactating mothers.

DOSAGE & ADMINISTRATION

1 capsule 3 times daily after meal or as directed by physician.

PRECAUTION

Fenugreek is in the same family with peanuts and chickpeas, and may cause an allergic reaction in moms who are allergic to these things. Fenugreek reduces blood glucose levels and also reduces blood cholesterol. Dosages higher than the recommended one may result in hypoglycemia in some mothers. So mothers who are diabetic should use fenugreek only the individuals have good control of their blood glucose levels. Mothers with hypoglycemia should also use fenugreek with caution.

SIDE EFFECT

Common side effects includes nausea, vomiting, gas, diarrhea, urine smells like maple syrup etc.

CONTRAINDICATION

Hypersensitivity to the active substance or any of the excipients.

DRUG INTERACTION

Glipizide and other antidiabetic drugs: Fenugreek reduces blood glucose levels and may enhance the effects of these drugs.

Insulin: Fenugreek reduces blood glucose levels, so insulin dosage may need to be adjusted.

Heparin, Warfarin like anticoagulants, Ticlopidine and other platelet inhibitors: Fenugreek plant potentially could cause bleeding if combined with these types of drugs.

PREGNANCY & LACTATION

Ingredients used in the capsule can induce unintentional labor. So it should not be used in pregnant mothers.
