

Protox Aqua™

High Quality Probiotics for Aquaculture

Composition:

Rhodopseudomonas palustris and *Rhodobactor capsulatus* (1.2×10^9 cfu/ml), *Bacillus* spp. (2×10^9 cfu/ml)

Indication:

Prevents black soil in the pond/gher; Controls hydrogen sulphide effectively; Reduces toxic gases like H₂S, NH₃ and NO₂; Enhances the degradation of organic wastes; Shows efficacy at even high and low saline and pH conditions.

Dosage & Administration:

During pond prevention: 1-2 L/Acre/3 ft depth

During pond management: 2-3 L/Acre/3 ft depth

Administration:

Mixing with coarse sand or Aqua Rock/Zeo-Fresh and broadcast directly to the pond.

Or, as recommended by aquaculture specialist.

Withdrawal Period:

None

Drug Interaction:

No side effect observed with other chemicals and medicine.

Storage:

Store in a cool and dry place. Protect from direct sunlight.

Pack Size:

1 Litre Bottle

For aquaculture use only.
