

De-rash[®] Plus Ointment

Miconazole Nitrate 0.25% + Zinc Oxide 15% + White Soft Paraffin 81.35%

COMPOSITION

De-rash[®] Plus Ointment: Each gram of Ointment contains Miconazole Nitrate BP 2.5 mg, Zinc Oxide USP 150 mg & White Soft Paraffin BP 813.5 mg.

PHARMACOLOGY

Miconazole is a broad-spectrum antimycotic which offers a high antifungal activity against dermatophytes, yeasts and other phyco-asco and adelomycetes, with a potent antibacterial activity against gram-positive bacilli and cocci. Miconazole is proved to be markedly effective in secondary infected mycoses. Zinc Oxide and White Soft Paraffin exert an emollient effect by forming an occlusive film which reduces trans-epidermal water loss, thus helping to maintain normal skin humidity levels.

INDICATION

De-rash[®] Plus Ointment is indicated for the treatment of diaper dermatitis associated with fungal infection.

DOSAGE & ADMINISTRATION

Before applying Ointment, gently cleanse the skin with lukewarm water and pat dry with a soft towel. Avoid using any scented soaps, shampoos, or lotions on the diaper area. Should be applied to the affected area at each diaper change for 7 days.

USE IN PREGNANCY AND LACTATION

No adequate and well-controlled studies in pregnant women. Pregnant women should exercise appropriate precautions when administering the product. Safety and efficacy of the product have not been established in nursing mothers. It is not

known if the active components of this ointment may be present in milk. Nursing mothers should exercise appropriate precautions when administering the product.

CONTRAINDICATION

Ointment is contraindicated in those patients with a history of sensitivity reactions to any of the ingredients of this preparation. It should be discontinued if hypersensitivity is noted.

ADVERSE EFFECT

Well tolerated. Does not show any significant side effect. Sometimes, skin irritation may occur.

STORAGE

Store at 20° to 25°C. Keep all medicines out of reach of children.

HOW SUPPLIED
