

SQZYMETM SME Powder

Powerful Cocktail Enzymes from Submerged Fermentation

Composition

Each gram SQZYMETM SME Powder contains –

Enzymes	Minimum Activity Unit
Amylase	7,400 U
Xylanase	2,000 IU
Beta glucanase	200 IU
Protease	900 HUT
Pectinase	30 IU
Cellulase	15,000 U
Phytase	500 FTU
Lipase	5,000 USP

Indication

To improve digestion of feed ingredients including NSP's (Non Starch Polysaccharides) and anti-nutritional factors present in the feedstuff like certain plant residues, which cannot be digested due to lack of endogenous enzymes.

Advantages of SQZYMETM SME Powder

1. Active ingredients are completely water soluble
2. SME technology ensures most consistent result than other enzymes in the market
3. Stable at varied pH condition of the gut
4. Extended volume of Phytates results in higher phosphorus availability by reducing fecal loss of Phosphorus
5. Makes nutrient available in the intestine
6. Helps in increasing the utilization of energy, minerals other micro and macro nutritional components leading to better FCR and production performance
7. Helps in improving the litter quality & reduces environmental pollution leading to health benefit of the birds
8. Help to break down long carbohydrate molecules known as NSPs thus reduce anti-nutritional factors leading to faster and complete digestion

Dosage & Administration

Layer: 150gm/Ton of Feed – use regularly

Broiler: 200 gm/Ton of Feed – use regularly

Breeder: 150gm/Ton of Feed – use regularly

or as suggested by poultry nutritionist or registered veterinary doctor.

Contraindication: None

Drug Interaction: It is compatible with other medicinal products and all other forms of feed additives

Withdrawal period: None

Storage: Store at room temperature, cool & dry place.

Pack Size: 1 Kg plastic container & 25 Kg bag.
