

Aqua Care™

Optimum Combination of Maximum Probiotics & Minerals for
Perfect Pond Management

Composition:

Probiotics: *Bacillus subtilis*, *Alcaligenes denitrificans*, *Lactobacillus helveticus*, *Lactobacillus lactic*, *Saccharomyces cerevisiae*, *Nitrosomonas sp.*, *Nitrobacter sp.*, *Pseudomonas denitrificans* & *Bacillus licheniformis*.

Minerals: Manganese sulphate, Venedium oxide, Ferrus sulphate, Copper sulphate, Cobalt sulphate, Calcium oxide, Silicon di-oxide, Magnesium oxide, Phosphorous pentaoxide.

Benefits:

- Keeps the pond bottom clean by efficiently removing organic waste
- Ensures a safer aquatic environment by eliminating the production of harmful gasses such as hydrogen sulfide, nitrite, and ammonia.
- Maintains suitable water and soil quality for sustainable fish farming
- Promotes plankton growth, sustaining a healthy and balanced pond habitat
- Inhibits growth of harmful bacteria and disease-causing pathogens
- Increases survival rates of fish and shrimp
- Boosts overall fish and shrimp production

Dosage and Administration:

During Pond Preparation: 3-4 kg/acre/3-5 feet water depth

During culture period: 4-5 kg/acre/3-5 feet water depth (depending on the overall environment of the pond, stocking density and cultivation period)

Or as per the advice of an Aqua Consultant

Method of Application:

Mix with dry, coarse sand and broadcast directly to the pond to get the best result.

Drug Interaction:

No side effect with other chemicals and medicine. Do not use probiotics and disinfectant at the same time.

Withdrawal Period:

None

Storage:

Store below 30°C temperature and avoid direct sunlight.

Pack size:

1 Kg Sachet
