

# Apthocare<sup>®</sup> Powder

Vitamin C, Potassium Iodate, Glutamic Acid

## Composition:

Each 100 gm powder contains:

|   |        |
|---|--------|
| Vitamin C                               | 200mg  |
| Potassium Iodate (equivalent to Iodate) | 100 mg |
| Glutamic acid                           | 50 mg  |

The ingredients incorporated along with the "Fortified base" in Apthocare<sup>®</sup> take care of the deleterious effect on Thyroid gland, regulates the BMR (Basal Metabolic Rate) & recoups the vitality and overcomes the effect of F & M virus such as Hypertrichosis, Panting, Ptyalism, Hyperthermia & Infertility.

## Indication:

- Aphthous lesions very fast after affects of FMD
- Thyroid imbalance
- Ptyalism
- After-effects of F&M leading to infertility and panting
- Hypertrichosis

## Mode of Action:

It contains Glutamic acid which enhances the production of proline and hydroxyproline (both amino acid) to recover from sore by covering epithelial membrane. In this way sore is healed easily. It comprises iodate which enhances growth of the body to correct thyroid imbalance. Vitamin C has reported to have antiviral properties as it stimulates interferon production. It is best known for the role in basement membrane collagen production deformities, capillary fragility, periodontal disease (disease of teeth) and bone deformities that characterize scurvy.

## Dosage and Administration:

Cattle, Buffaloes & Horses - 25 gm thrice daily for 5-7 days orally.

Goats and Sheep's - 15 gm thrice daily for 5-7 days orally.

Usage Instruction - Please apply gently at recommended quantities thrice daily on the surface of the tongue of cows.

## Pack Size:

100 gm sachet pack
