

Toxol[®] Feed Premix

Liver Protector & Stimulator

Composition:

Choline, Methionine, Inositol, Vitamin B₁₂ in a base fortified with predigested protein and Aminonitrogen (Lipoacceptor Protein).

Indications:

Protects liver from adverse effects of toxins. Keeps liver clear, healthy & active. Improves nutrient utilization. Enhances liver function for better production.

Benefits of Toxol[®] Feed Premix:

- Toxol composed of lipotropic factors and a lipoacceptor protein (Aminonitrogen) provides the most comprehensive liver care during general and specific problems of liver.
- Lipoacceptor protein makes gut stable, helps to move excess accumulated fat in hepatocytes, making hepatocytes more active.
- Toxol can prevent liver insufficiency due to exogenous and endogenous toxins and stressors.
- During stress, Toxol supplementation can help the bird to overcome the adverse effects on liver and come back early to normal productivity and FCR.

Dosage & Administration:
